

RIGHT TO THE POINT

ISSPRO's EV² Series matches your OEM gauges to a "T". LED lighting matches, colors match, and fonts match. As a long time supplier to truck OEMs we understand the importance of finely tuned design details.

RIGHT TO THE POINT

At ISSPRO, your call really IS important to us. A human being answers our switchboard, and you don't need to press any buttons to get real help when you need it.

RIGHT TO THE POINT

ISSPRO has been engineering and building instrumentation for over 70 years. In addition to aftermarket performance gauge systems, we custom design instrumentation for OEM customers.

RIGHT TO THE POINT

American ingenuity is alive and well at ISSPRO. EV² gauges were designed by American engineers and built in ISSPRO's Portland, Oregon factory.

ABOUT ISSPRO

ISSPRO, Inc. is a global supplier of electronic instrumentation, sending units, and controls for monitoring engine and vehicle systems..

ISSPRO boasts a history of 70 years as an American manufacturer of quality products. Headquartered in Portland, Oregon, the company holds UL quality certifications in IATF 16949 and ISO 9001 as a manufacturer of motor vehicle components and accessories.

EV²

MECHANICAL GAUGES

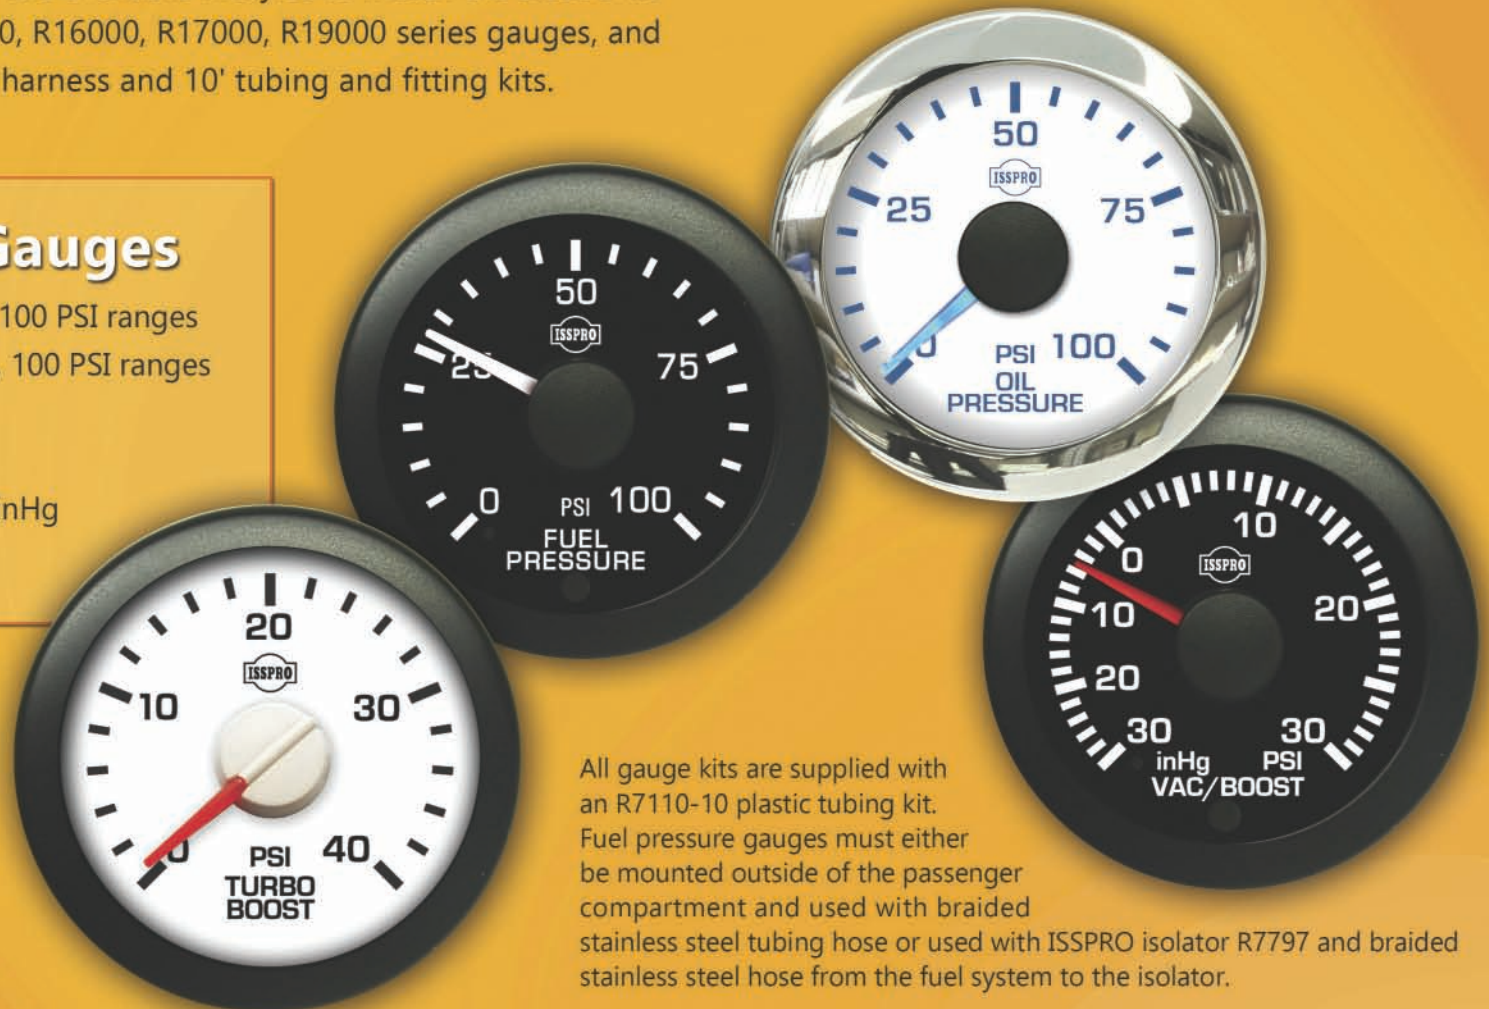

ISSPRO MECHANICAL GAUGES

These gauges visibly match the popular EV² series of electronic gauges, including the shallow depth necessary to fit in aftermarket gauge pods and include retaining features which allow them to snap fit into most aftermarket gauge pods. Pricing is below similar electronic EV² gauges allowing typical 3 and 4 gauge kits to be more cost competitive. Lighting is via lifetime built in LED's, offering a crisp and clean appearance. Another unique feature is the availability of different backlight voltage curves, to better match the brightness of your factory dash lights as the dimmer is turned down.

EV² mechanical gauges come in turbo boost and fuel pressure ranges of 30, 40, 60, & 100 PSI, oil pressure 100 PSI, Vacuum 0-30 inHg, and Vacuum/Boost 30PSI/ 30 inHg. They are available in styles to match the electronic EV² R11000, R12000, R13000, R14000, R16000, R17000, R19000 series gauges, and come complete with lighting wiring harness and 10' tubing and fitting kits.

EV² Mechanical Gauges

Turbo Boost available in 30, 40, 60, 100 PSI ranges
Fuel Pressure available in 30, 40, 60, 100 PSI ranges
Engine Oil Pressure 100 PSI
Vacuum Pressure 30 inHg
Boost/Vacuum Pressure 30 PSI/ 30 inHg

All gauge kits are supplied with an R7110-10 plastic tubing kit. Fuel pressure gauges must either be mounted outside of the passenger compartment and used with braided stainless steel tubing hose or used with ISSPRO isolator R7797 and braided stainless steel hose from the fuel system to the isolator.
